"The House Famous for Lawn Grass Seed"

After a Quarter of a Century

IT IS now over a quarter of a century since Burnett's Seeds were first offered to the American garden-loving public, but for many years previous to that, the name "Burnett" had been prominently associated with some of the leading Eastern horticultural establishments and enjoyed a favorable reputation among a host of the most eminent estate superintendents and gardeners in the Eastern and Mid-western estates.

With the previous experience and the sound business principles of the Burnetts the future destiny of the concern was a pronounced success from its inception.

That it has been a success is reflected in the ever-increasing popularity of BURNETT'S SEEDS, not only among those who have made gardening a profession, but also among those who garden for the pleasure and health-giving exercise it affords.

The reliability of the stocks we offer is mainly due to our close identification with the actual production of a great proportion of them, and our ability to select from other sources than our own, such stocks as we know are up to the BURNETT STANDARD, and pronounce judgment rather than solicit it. "Reliability and prompt service" is the working motto of every member of our staff.

We have been repeatedly told by leading gardeners that Burnett's Annual Offerings of new and recent introductions in all departments of Horticulture are dependable.

Our selected strains of the better known items are from the world's most noted sources.

Appreciating the patronage already extended to us and with the above record behind us, we are again prepared to serve you for a bigger and better garden year in 1931.

Burnett's Lawn Grass Seed Mixtures

Lawn View of Private Estate Sown with Burnett's "Special" Lawn Grass Seed Mixture.

Burnett's "Special" Lawn Grass Mixture

The above mixture is made from our own formula, and composed of grasses specially adapted for the purposes of producing turf which retains its rich green color and velvety appearance throughout the entire Summer and Fall. In making up this high grade mixture we are careful to use only the very finest quality of all the most desirable dwarf evergreen, re-cleaned grasses, free from chaff and weeds, which thrive well on any soil, thus ensuring a beautiful and permanent lawn. To obtain best results Lawn Grass Seed should be sown as soon as the ground can be prepared in early Spring. It may also be sown in the Fall with good results.

Quantity Seed Required

For making New Lawns, we recommend sowing at the rate of 125 lbs. to the acre (approximately 6 bushels). Where small quantity is required, sow 1 lb. to each 400 square feet (20' x 20'). **For renovating old lawns, use half the quantity.**

1 lb. 65c., 2½ lbs. \$1.60, 5 lbs., \$3.00, 10 lbs. \$5.75, 20 lbs. \$11.00, 100 lbs. \$55.00

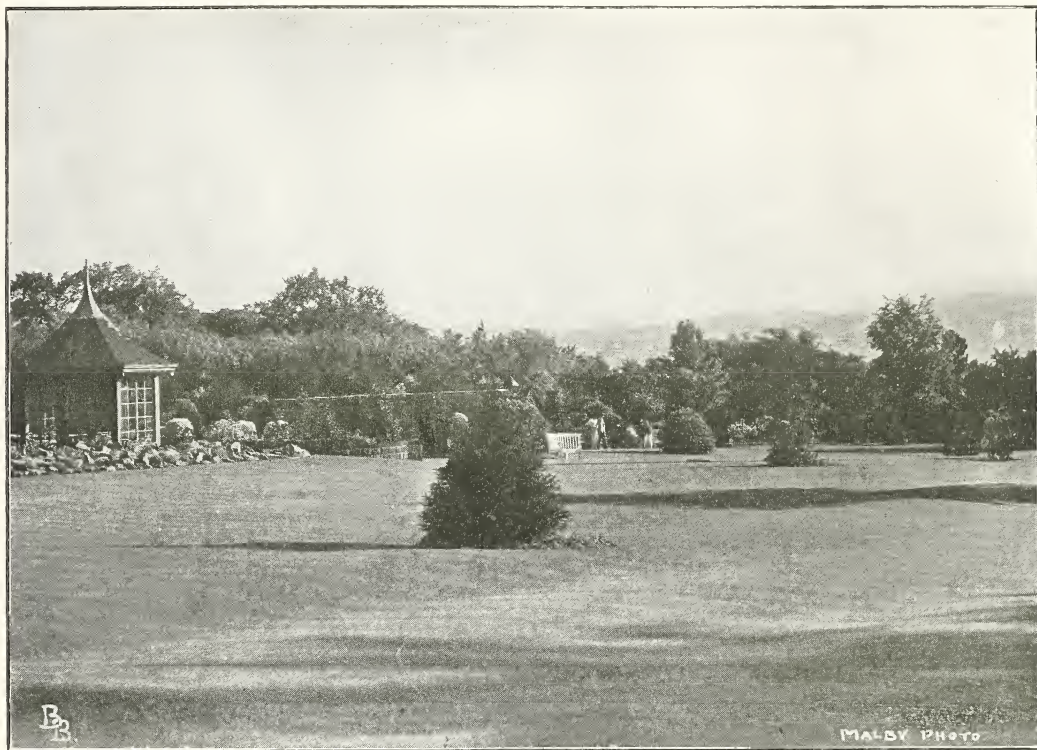

(20 lbs. of Burnett's "Special Mixture" is approximately one bushel.)

Lawn Remarks

A perfect and enduring lawn, one of velvety appearance with closely interwoven, firm, deep and elastic turf, is only created by sowing a composition of the various kinds of grass seeds suited to the conditions and the climate. Several varieties are needed, that the lawn may be evergreen during all seasons and the seeds must be sown liberally (at the rate of from five to six bushels per acre), not only that a lawn may be produced quickly, but because the kinds of grasses suitable for perfect lawns are fine-leaved and should take entire possession of the ground promptly, thus checking the development of weeds, the seeds of which are in all soils. Good, rich deeply worked soil, either of a friable texture or thoroughly drained, is as necessary for the production of a perfect lawn as for garden crops. Early and frequent mowing and rolling, as well as the liberal application of water, which should be applied in the early morning, or late afternoon during dry seasons, is one of the secrets of maintaining beautiful green turf from early Spring to late Fall.

Prevent and Control BROWN PATCH in your lawn. SEMESAN controls this fungous disease.

Burnett's Lawn Grass Seed Mixtures

View of Lawn sown with Burnett's Famous "KILLARNEY" Lawn Grass Seed Mixture.

Burnett's "Killarney" Mixture

Burnett's Lawn Grass Seed Mixture "Killarney" is composed of a combination of the very finest European grasses and fescues, the highest grades possible to procure, and specially adapted for this climate. This mixture is composed of all solid, re-cleaned seeds of the highest germination. Therefore, owners of large estates requiring a permanent sod and everlasting lawn should by all means use this high-grade mixture. If the ground is properly prepared, we are certain "Killarney Mixture" will produce a turf of velvet, equal to the most famous Lawns in Europe. Give it a trial. "Sow Killarney and walk on Velvet."

lb. 75c., 2½ lbs. \$1.80, 5 lbs. \$3.50, 12½ lbs. \$7.75, 25 lbs. \$15.50, 100 lbs. \$60.00

(25 lbs. of "Killarney Mixture" is approximately one bushel.)

Burnett's "Central Park" Mixture

This well-known mixture contains a large proportion of permanent grasses that grow quickly, producing a rich, green sward in about four weeks from time of sowing. "Central Park" is very hardy and has always given entire satisfaction in any location wherever sown. 1 lb. 60c., 2½ lbs. \$1.40, 5 lbs. \$2.50, 10 lbs. \$4.75, 20 lbs. \$9.00, 100 lbs. \$45.00

(20 lbs. of "Central Park Mixture" is approximately one bushel)

Burnett's "Play Ground" Mixture

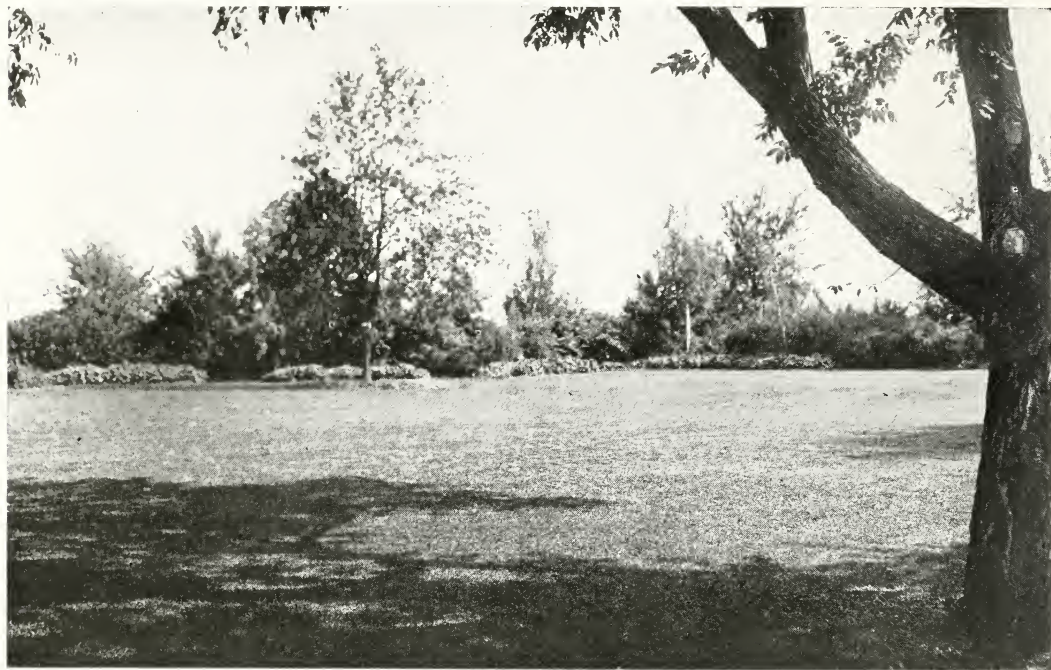

The above mixture is adapted for a strong, hard-wearing turf of the finest texture, and is composed of some of the hardiest grasses, which will produce a close, thick sod and stand hard usage under all conditions. For Play-Grounds or any place where a strong turf is necessary, this mixture cannot be equaled. We recommend sowing separately some white clover with this mixture.

20 lbs. \$9.00, 100 lbs. \$45.00.

(20 lbs. of "Play Ground Mixture" is approximately one bushel.)

Note: To destroy worms in your lawn, use Electric Worm Eradicator. (See page 108.)

Burnett's Lawn Grass Seed Mixtures

View showing Lawn sown with Burnett's "SHADY PLACE" Lawn Grass Seed Mixture.

Burnett's "Shady Place" Mixture

When a lawn is much shaded, either in whole or in part, the shaded portions should be sown with Burnett's "Shady Place" Lawn Grass Seed Mixture, which is a combination of fine, dwarf-growing evergreen varieties, which, in their wild or natural state, are to be found growing in the woods or other sheltered or shady places. Under or in the immediate neighborhood of large trees fertilizers should be applied liberally and frequently, for the trees absorb the fertilizer and impoverish the ground. Ground much shaded is very frequently sour, and if the drainage is defective it is apt to be covered with moss. In such cases an application of lime or wood ashes raked in will sweeten the soil, but the moss should be first removed with a sharp steel-toothed rake.

1 lb. 75c., 2½ lbs. \$1.80, 5 lbs. \$3.50, 10 lbs. \$6.50, 20 lbs. \$12.00, 100 lbs. \$60.00
(20 lbs. of Burnett's "Shady Place Mixture" is approximately one bushel.)

Burnett's "Bank and Terrace" Mixture

On sloping banks it is often necessary to use sod, as heavy rains wash the soil off before the grass seed has time to germinate. It is sometimes even necessary, in sodding very steep banks, to use pins eight or ten inches in length to pin the sods in place, to prevent them from being washed down by excessive rains before the grass roots have had time to fasten in the soil. The Terrace mixture which we offer is composed of deep-rooting grasses which, if once established, will hold the soil and prevent washing, and we advise liberal fertilizer and seeding so that the grasses may be quickly established.

1 lb. 75c., 2½ lbs. \$1.80, 5 lbs. \$3.50, 10 lbs. \$6.50, 20 lbs. \$12.00, 100 lbs. \$60.00
(20 lbs. of Burnett's "Bank and Terrace Mixture" is approximately one bushel.)

Burnett's "Seashore" Mixture

If a few inches of top soil is spread over the surface, and well firmed, an application of Burnett's Special "Seashore" Mixture will produce a good lawn in six or eight weeks. An occasional application of pure Sheep Manure during the spring, summer and fall months will increase the strength and color of the grass. Our formula has been thoroughly tested out in various localities. If the soil is exceptionally poor, and it is not possible to apply a layer of top soil, White Clover will help to make the sod thick, and also protect the grass.

1 lb. 60c., 2½ lbs. \$1.40, 5 lbs. \$2.75, 10 lbs. \$5.25, 20 lbs. \$10.00, 100 lbs. \$45.00
(20 lbs. of Burnett's "Seashore Mixture" is approximately one bushel.)

BURNETT'S GRASSES AND CLOVERS

FOR HAY, MEADOWS AND PERMANENT PASTURES

OUR Permanent Pasture, Hay and Meadow Mixtures are composed of varieties of grasses best adapted for producing an abundant and nutritious food supply for stock. Our formulas are arranged with great care and the mixtures are made to suit the exact location and condition of soil, etc., for which they are needed.

Nothing but the best re-cleaned seeds are used, consequently it does not take so large a quantity per acre as that generally used when poor quality mixtures are sown.

We recommend four bushels to one acre, which may be sown either in the Spring or Fall, with an additional ten pounds of Mixed Clovers sown early in the Spring. When ordering please state whether for high, dry, medium, wet or heavy soil.

Tomato, Westchester Pryde

"Westchester Pryde"

Westchester Pryde, while we claim for it to be a forcing variety, has been grown outside the past season with remarkable success, bearing 40 lbs. of fruit to the plant. Trusses from 12 to 24 to the plant and contain from 15 to 40 fruits to each truss, weighing on an average 4 fruits to a pound. We have had this variety on exhibition in our show window the past season and same was admired by all who saw it. Do not fail to grow Westchester Pryde.

Pkt. 25c., $\frac{1}{4}$ oz. \$1.25.

"Break O'Day" (new)

Developed by Dr. Fred J. Pritchard of the Department of Agriculture, Washington. Burnett's Reliable Flower Seeds

A well planned Old-fashioned Garden

Aid for the Amateur.

One of the most fascinating and economical ways of making a flower garden, is in raising the plants from seed. One sees far too many of those summer gardens of Cannas, Geraniums, Salvias, Coleus, etc., that are more or less characteristic of the order telephoned to the florist round the corner, to "come and fix up the garden"; very effective in their way, but their similarity and frequency are monotonous, and what is more, such gardens are expensive. A few packages of well chosen annual seeds costing but a few cents, give far more enjoyment in the raising, and a much more useful and interesting variety of flowers.

Flowers that can be raised from seed are divided into 7 classes, viz:—

- H. A.—Hardy Annuals.** Seeds sown outdoors where they are to bloom; they die after the first year.
- H. H. A.—Half Hardy Annuals.** Those that are sown under glass in the early Spring and transplanted outdoors in April and May.
- H. B.—Hardy Biennials.** Seeds sown outdoors and bloom the next year; some bloom the first year if sown early.
- H. H. B.—Half Hardy Biennials.** Seed sown one year under glass and planted outdoors the following Spring.
- H. P.—Hardy Perennials.** Seeds sown outdoors one year, bloom the next and each succeeding year without protection.
- H. H. P.—Half Hardy Perennials.** These bloom from seed the second year, but need winter protection thereafter.
- G. P.—Greenhouse Plants.** Tender plants for growing under glass.

Our list of Flower Seeds has again been carefully revised and comprises only the choicest and most select types in their respective classes, which we are certain will give satisfaction.

HORTICULTURAL TOOLS and SUNDRIES

DURING our many years in the seed business, we have been called upon from time to time to procure for some of our many customers, certain British-made Horticultural Sundries, to which they had grown accustomed since their apprenticeship.

These many requests have resulted in this array of tools illustrated above.

For the convenience of our patrons, we have standardized these implements and offer them in addition to our regular high grade American made goods, as a feature of Burnett Brothers.
